website development proposal

Let's build you a custom made website with a unique URL! This website will be accessible from every country around the world—and with one click, customers will be able to download your menu to their mobiles.

By having a website, it is also much easier for customers to find your restaurant when searching Google.

Your professionally designed website will include: a header, a banner, about section, menu, map, gallery and a footer with links to your amazing social media pages. In total, we will code three website pages (home page, gallery, downloadable menu).

coding
- custom built code
- clean and beautifully designed
- responsive (made for mobile, tablet, laptop, desktop)
- easy to navigate
- downloadable menu
- gallery

$850

seo (search engine optimisation)
- built into the head
- meta tags
- links
